

ABOUT ME

Hello there, my name is Tareq and I am a frontend Engineer who is driven by passion and the will to learn towards Web Development. I have achieved and succeeded in changing my career path from a Linguist to a developer, yes that's right, I have dived into the code, into the bits and pieces of frontend development until I kickstarted the inner developer of me.

I have a good experience throughout the companies I worked in, from doing basic HTML pages, to making single page JS applications where performance is a must.
